Subject: RE: Data Format

Jeff – thanks for your quick response. I am probably the least savy person on this subject and both Liz and Dan are in the field next week on separate projects. I'd like to get something to the PRP soon as they are making arrangements for their data collection in a couple of weeks. They have a "subscription"? to SCRIBE and have "perused" the system.

I guess I don't know enough about the process to know which option would be best in this situation but I like the idea of them loading the data into SCRIBE themselves to save us the effort (or an EPA contractor) but I guess at some point we have to review (verify??) that the data that they have "parked" in SCRIBE we are willing to accept. I need to know more about how all this works.

Thanks.

Paula,

I have attached the most current draft of the Data Management Plan which hopefully will answer their questions. This is being reviewed by management and hopefully the signed DMP will be released soon.

Appendix "C" in the DMP has the contact information for ERT Support. The RP may call them for support at no charge and I encourage them to do so if they have questions about Scribe.

There are several different options regarding loading RP data into Scribe. Ideally, they would produce a Scribe-ready EDD and load these data to Scribe themselves and publish to a separate subscription. Then if you are all comfortable with it, ERT can merge these data with other Scribe projects in a combined database. We can also have ESAT load these data to Scribe from the EDDs, or the RP can submit an Excel spreadsheet or Access database to us. I would like to have a more in depth discussion with you, Liz and Dan about these data and see what they have. John may also want to be in on this discussion.

I hope this helps.

Subject: Data Format

John – Jeff – Not sure which one can provide the answer to this. Dan, Ian and I had a lengthy discussion with Sunnyside (a PRP) at the Upper Animas Mining District about their work plans/QAPPs for their upcoming field investigations. One of the questions that came up was what electronic format they should provide their data to EPA. Assuming that we are comfortable with the quality of their data, then we may wish to enter their data into SCRIBE. So the question is what format – spreadsheet, database, etc. should they submit their data to us? I know there are some format requirements for data going into scribe. Please send me the format requirements so that I can forward to Sunnyside ASAP.

Also, since I'm not familiar with data – SCRIBE, is there someone they can speak with about the formatting if they have any questions. Thank you.
